Miele
Anything else is a compromise

The New Miele S Series

The Redefinition of Purity

Since 1899

Since its inception in 1899, Miele has never stopped pioneering the way in technological advancement and breaking new ground in durability and design. Always redefining the present to forge the future. Every single aspect is perfected, down to the last detail. Only the best makes it to the homes of our customers. It is this dedication to quality that has won the hearts of consumers the world over. And today, this dedication is shared by 16,000 employees around the world. Miele continues to win the trust of consumers, seeking ways to improve your life.

It will continue to be Forever Better.

The Redefinition of Purity

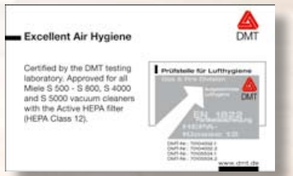
The Miele S Series vacuum cleaners are the ultimate in floorcare.
Each model has been carefully designed to meet your specific needs.
Every last detail crafted to create the perfect purifying tool.
The sculpting of its form, fine-tuning of its function, and even the
selecting of its colour has been performed with you specifically in mind.

The Pursuit of Purity

Complete Vacuum Cleaner HEPA 12 Certification

A trinity of redefined purity is created, when complete HEPA 12 certification is synergised with the superior HyClean dustbag, and optimised air discharge filters.

Fitted with an Active Air Clean Filter or Active HEPA Filter, all Miele vacuum cleaners are entirely dust-tight. Full compliance with Germany's DMT air-hygiene institute requirements and the European standard for filter systems (EN 1822) ensures a complete peace of mind.



Excellent Air Hygiene
DMT
Certified by the DMT testing laboratory. Approved for all Miele S 500 - S 800, S 4000 and S 5000 vacuum cleaners with the Active HEPA filter (HEPA Class 12).
Prüfstelle für Lufthygiene
DMT

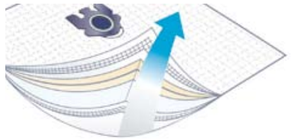
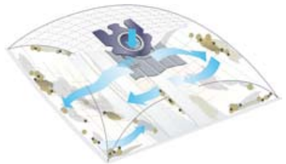
HyClean Dustbag

Designed to achieve the highest level of hygiene, Miele HyClean dustbag redefines purity with its new improved technologies. The new HyClean dustbag comes with 9 piles rip-proof netting that protects the dustbags from tearing and intelligently improves filtration with the all-new integrated air-flow guides that will usher dust into the far corners of the bag. This results in 25% higher capacity - without any compromise in cleaning performance. The new automatic hygiene lock seals the dustbag tightly as soon as the dust compartment is opened, so a full dustbag can be disposed cleanly and hygienically.





Optimised Air Discharge Filters

3 discharge filters meet different needs:

- Super Air Clean
  Excellent regular cleaning
- Active Air Clean
  Active charcoal filter neutralises odours
- Active HEPA
  Removes microparticles, ideal for allergy sufferers

The Miele S Series vacuum cleaners' optimised air discharge filters have the hygiene seal of approval from Germany's TUV laboratories. They are proven to substantially reduce the levels of pollutant in ambient room air, and have legendary durability with high performance ratings.

Super Air Clean Filter

Active Air Clean Filter

Active HEPA Filter

The Miele S Series family.

Borne of the same pursuit of purity and commitment to exacting quality, they share the Miele heritage of progress and perfection. Set apart by colour, and different range offerings, they all seek purity. With family traditions like HEPA 12 first class hygiene, superior cleaning performance, excellent user convenience and quality design.

Within the Miele S Series family, you will find a model which belongs to you.

The S 4 Series

S 4212

Everything Essential

Exercise full control with electronic suction regulation with 6-setting rotary dial and be assured by the effective Super Air Clean Filter.

In Anthracite

Controls

- Electronic suction regulation using rotary dial
- Gentle motor startup
- Silence – sound insulation

Performance

- 2,000 W

Filter System

- Useable dustbag volume 3.5l
- HyClean dustbags (Type F/J/M)
- Super Air Clean Filter

Manoeuvrability
